Now up to **48 36- Mile Range** at almost **1/2 PRICE** of earlier Models.

36 miles. Really? [Read My Take On It.](#)

~~NEW~~ **36-Mile Think Speak Plus**

On the job, on the field or now half way across town, you can talk and listen 'hands free' at a new breakthrough price with REAL GMRS 2-Way Crystal Clear, Static Free, 3 now 5 Watt up to ~~48-mile~~ now 36-mile range automated communicators. Plus just added is Weather Alert Radio to keep you safe. And you get a Full 3-Year Parts & Labor Warranty because they are industrial tough to last a long, long time. **They are like Walkie Talkies On Steroids.**

By Drew Kaplan

SWAT teams use them. So do quarterbacks and firemen. Now you too can talk and

listen to people near and far, totally hands free, while you are jogging, sailing, skiing, hiking or riding a bike.

Both at work and at home, this unique new GMRS communications system, with a range up to ~~48~~ now 36 full miles will let you keep in touch for both safety and fun. They are so easy to use.

Just push the Button to talk, or set it to automatic and it will transmit whenever you talk.

And there are 5 sensitivity settings so you don't have to yell to use the automatic broadcast functions.

Look What You Get Added FREE

Just upgraded to 36-mile range and from 22 to 42 Channels.

Plus Save Big Look what you save - The \$29.90

Rechargeable Battery Pack and Charging Cradle plus AC & Car adapter **Are Now Included Free.** The \$19 Mic/Earpieces **Are Now included Free.**

You save **\$48.90** from the originals.

Do they really go 36 miles? [Read My Take.](#)

Not A Walkie Talkie It's Like A Walki Talki On Steroids Not Even An FRS.

This is no toy. The new Think Speak Plus is totally automated. When you speak, a special voice activated circuit (**eVOX with ~~two~~ now 5 sensitivity levels**) automatically engages the transmitter so you are broadcasting.

When you stop speaking, it will automatically return to 'Standby' to await a reply.

It is virtually noise free because it's on the 462 MHz band and it's FM modulated.

Just \$59.95 a PAIR

So, your communications won't sound like a CB or an AM radio. And they won't be limited to the 7 channel, 0.5 watt, up to 2-mile FRS Family Radio Range either.

With GMRS (General Mobile Radio Service) you'll speak and hear with the full power and clarity of **3 Now 5 full watts** extending up to ~~48~~ now 36 full miles.

(That's **more than 600 percent more power** than FRS.)

It's Safety, Security and Fun at:

- The Mall
- [From the Store to your Home](#)
- [Camping, Fishing or hunting](#)
- [Across an entire college campus](#)
- [Around a cruise ship](#)
- [Across Disneyland](#)
- [Between ships](#)
- [Caravanning in cars or campers](#)
- [Hiking, skiing or Sailing](#)

It really makes the difference between whether you can communicate at all or not.

Here's What It Is

It fits In My Hand. If you're hunting or skiing, these are serious communication devices. If you're caravanning with 2 or more cars, **the new 5 watt 48 now 36-mile range** blows away FRS radios.

And frankly it's just nice to discuss which movies we've seen while my wife's at the video store and I'm at home.

Plus Now, you get a built-in weather alert radio. These GMRS 2-ways really are great.

It's just about 7.5 ounces with batteries. It's so small and light that you'll take it with you everywhere you go. You can hold it in your hand or wear it on your belt or **drop it into a pocket or purse.** It really does fit.

It has the eVox voice activation circuit. It has 2 now 5 VOX sensitively levels. that works **with BOTH** the handset (no headset needed), OR with the optional headset/mikes.

The Truth About Range. Drew's Take.

Will these really go 36 miles? Well over water or over desert yes. In the city, they will go less. With the new full 5-watt output and tuned receivers these go farther than ever before. But in my humble opinion, you'll never see 36 miles in the type of use you're likely to experience.

Of course if you're on a mountain top conferring with the Oracle of Delphi and want to pass the wisdom on to another oracle on another mountaintop, or if you're in the crow's nest of the Pinta or the Nina and you want to let Columbus on the Santa Maria know that you've found America, then you might get the full 36 mile range. The range on these really is remarkable, 36 miles or not.

So, if you're riding a motorcycle or breathing hard while you jog, ski or chase wild game, you can use the eVox with **EITHER** the handset or the optional Headphone Mikes.

If you're hunting or fishing and you can't talk much over a whisper, just override the eVOX by touching the Push To Talk Button. This is a really great feature when you want to whisper very quietly below the eVox threshold.

Or use the **New Vibrate Call Alarm** to know when you have an incoming message.

Note: Being able to talk hands free without the headset mike can be a real advantage.

In addition to the 3 now 5 level eVOX Voice Operated Circuit, you'll have 'PTT' which means Push to Talk. When you want to talk you just push the PTT button.

And if you're into surveillance or photographing wild life. When you can only whisper, you'll especially appreciate the super quiet FM modulated reception and static free transmission.

BUT There's More. With 22 now 42 Channels, do you have to scroll through all 22 now 42 to get to the Channel you want to use? No, just select your primary channel and every time you turn your Think Speak on, **it will power up on your chosen Channel.**

What's going on around you? Just touch Scan. It's a scanner too. **It automatically scans all 22 now 42 channels for you.** Just set it on scan to see who's 'on-line.' It automatically stops when it finds a 'live' transmission. It really is totally automated.

Roger Beep Anyone? Just select the Roger Beep, and every time you release the PTT button you'll send a short tone to tell your listener(s) that you're through. And that's a nice feature I really like.

And, a Useless Feature? OK, you get 142 Privacy Interference codes. When you broadcast and receive you'll only hear the codes that you've selected.

Most people think that they are privacy codes, but the truth is that everyone can hear you, but you'll only hear your own 'group.' Plus, if someone else is on your channel, you still can't use it even though you can't hear them. So you don't hear anyone else, but they can hear you. I just don't use the Privacy Codes. Maybe you will?

Oh and this is really important. I use the channels 23-42 and I've yet to run into anyone even here in Los Angeles. In a city as big as LA, I think it's great to be able to avoid the busy FRS channels.

A Few More Specifics Check These Out

The easy in the dark raised buttons make it all easy. Here you can see the the PTT Push to Talk button to the left so you can use manual talk when you aren't using the great Hands Free VOX feature that works **BOTH** with the optional Microphone/headsets or just with the handset too.

To the right is where you plug in the optional headsets. Not all GMRS and FRS Radios have this option. Ours do.

Just added. Hold the Menu Button for 3 seconds and you'll get all 11 NOAA Weather Band stations for up to the minute U.S. Government Weather forecasts and Emergency Alerts.

**Think Speak Plus
22 now 42 Channel
up to 48 now 36-mile
2-Way Communicators**

Qty. 1

You can expect long battery life from 4AA batteries. Plus, you can set it to high or low power. Very impressive. **But now we're Including the rechargeable battery packs and recharging cradle. So you'll never need to buy batteries at all.**

The system operates on the 460MHz band. It has ~~22~~ now 42 channels 7 which it shares with FRS and 15, which are pure GMRS.

And there are many more professional features to help you communicate anywhere, anytime.

There's a Backlit LCD display for in the dark viewing. Use the Removable Belt clip for go anywhere convenience. **And, push 'Key Lock' to freeze all your settings.**

This is great when you put it in your pocket or purse so it stays set the way you want it. The transmission output is a full RF 5 watts @ 6VDC (4 AA batteries)

Add a headphone (optional) for totally hands free private use. The boom mike headset is great for cars, bikes, motorcycles and skiing. When you want your hands totally free for other things, use the headphone. It's great. And it's very private.

Just added. 5 levels of VOX. That's the voice operated sensitivity. So now you can set it to respond at just the automatic level you need. Forget 2 and 3 levels. 5 different Voice Sensitivity is by far the best.

Personal Or Group Here's Where It Gets Really Good

You can talk to 1 or 10 or even 100 people with Think Speaks. There's no limit. So for ski patrols, hiking groups, or hunting parties, everyone can be connected up to a full ~~48~~ now 36 miles because of its new full 5 watts of power.

Plus you can broadcast to anyone with a regular FRS, but they'll only be able to receive and transmit back to on their limited 7 FRS channels and only from up to 2 miles away. Poor folks.

These long-range 2-way GMRS radios are nothing like FRS radios. The Think Speak communicators are great if you're skiing with friends, using two boats, or sailing at sea. And if you go hiking in the mountains, it's a must for safety.

They're great for **hang gliding, parasailing or ultra light** use because of their up to ~~48~~ 36-mile range and ~~2~~ now 5 level eVOX capability.

They really provide the communication that's often lacking and yet is essential to successful pickups and safety.

So if you're at one end of the park, you can talk to your kids, friends or Paint Ball partners just about anywhere they can go. If you're a pitcher, not only can you talk to the coach, but you can also probably talk to the talent scouts up in the stands or whenever they are up to ~~48~~ 36 miles away.

Heck, you can even talk to your wife at the store and have her add a something to the shopping list while you're still at home.

It's the new up to EIGHTEEN NOW THIRTY SIX (36) MILE RANGE that makes this the ultimate communication device. You simply can't do these things with the old 1/4 mile range original Think Speaks or even the newer FRS 2-mile range communicators.

Only with the full ~~48~~ now 36-mile range GMRS 2-ways can you actually communicate, well, long-range.

These new Ultra powerful Think Speak Plus GMRS communicators and weather alert radio are the **bridge between communicators and cell phones**. Plus there's no air time charges. And that's a good thing.

They are made by Midland, a leader in communication since I was a kid. They are just 4-1/2" tall (plus new 3" Hi-Power Antenna), 2-3/8" wide and just 1-3/8" deep. They run on 4 AA batteries, (or their now included NiMah Rechargeable battery packs and included charging cradle) require a license (link included in manual) and are backed by a **new THREE-year limited warranty**.

**Think Speak Plus
~~22~~ now 42 Channel
up to ~~48~~ now 36-mile

Take A Very Long Hike
And Still Be In Constant Touch.

Think mountains. Think golf. Go river rafting or Kayaking. This Two-Way radio longs to go outside inside and all around. Here we are looking down at the golf course. Think of your kids. If they're like mine, they're gone. But how often could they get up to ~~49~~ now 36 miles away? Now they're just a click away from saying, "I'm fine mom". And if they're not, they're in constant contact with you anytime anywhere in the mountains, in the mall or snowboarding way out of sight. Now you're never out of touch up to an amazing up to ~~49~~-now 36 miles away.

Try The Think Speak Plus
2-Way Long Range Communicators
Risk Free

<p>Think Speak Plus 22 now 42 Channel up to 49 now 36-mile 2-Way Communicators</p> <p>Now with FREE \$29.90 Battery Packs & charger Plus Free \$19 Mic/Earpieces You Save \$48.90 from the originals.</p> <p>Just \$59.95 Per PAIR Order No. 20279 - (\$8.95 P&H) In Your Cart Now: 0</p> <p>Qty. 1 <input type="button" value="BUY Click Here Add to my cart"/></p>

Walk around the block. Wait. Better than that. **Drive to the market and talk to your spouse.** Or, when was the last time you were at the video store and you wanted to check with your spouse to see if you'd seen a movie before you rent it?

Ride your bike on an ~~48~~ now up to 36-mile circuit. **No, ride your bike 3, 4, 5 or even up to ~~48~~ now 36 full miles in just one direction.** Really test the range of these incredible 2-Way GMRS radio communicators.

You'll be thrilled both by the extreme ~~48~~ now 36-mile range and the great FM quality crystal clear voice transmission quality.

And their many professional features. Plus there's no annoying AM or CB type of static. And that's a welcome change too.

Really give them a work out. Take them everywhere and see if they don't perform better than you'd have ever thought (really). If you're not 100% thrilled, simply **return them within 30 days in their original boxes for a prompt, courteous merchandise refund to your credit card.**

To order your **PAIR** of ~~22~~ now 42 Channel, full ~~3-Watt~~ now **5-Watt** GMRS, Think Speak Plus Communicators with up to ~~48~~ now 36 mile range, eVOX, PTT, and Backlit LCD status display PLUS NEW Weather Alert Radio for just **\$59.95 FOR THE PAIR (\$8.95 P&H)** click the **Buy Button** below. Order Number 20279.

Now when you think out loud, people will listen. Try the long-range Think Speak Plus Communicators risk free today. They go where no other 2-ways have gone before.

Think of the safety, convenience and productivity you could have with **5 full watts and up to ~~48~~ now 36 full miles** of hands free communication you've never had before. You'll be glad you did.

<p>Think Speak Plus 22 now 42 Channel up to 48 now 36-mile 2-Way Communicators</p> <p>Now with FREE \$29.90 Battery Packs & charger Plus Free \$19 Mic/Earpieces You Save \$48.90 from the originals.</p>

It fits in my hand. Yet it keeps me in touch like no other communications device I've ever used. We live in the hills where my cell phone doesn't work. (Yes we moved into this house before cell phones) It's very frustrating. Now I've got great reception and great communication any time anywhere. Plus at the mall, when we are riding our bikes, or when we caravan up to San Francisco to see my son and his wife, we can talk. Again, on I5, we had no cell phone reception, but we sure did have GMRS reception.

Now you get everything you see.

- 2- Think Speak Communicators
- 2- Ni-MH battery packs
- 1- Charging Cradle To charge Both units at the same time
- 1- AC adapter so you can plug the cradle into any standard AC Jack
- 1- Car Cigarette lighter adapter cable so you can plug the cradle into your car.
- 2- Belt clips
- 2- Ear/Mics for hands-free talking (uses the 5 VOX levels)

<p>Think Speak Plus 22 now 42 Channel up to 48 now 36-mile 2-Way Communicators</p>	
<p>Now with FREE \$29.90 Battery Packs & charger Plus Free \$19 Mic/Earpieces You Save \$48.90 from the originals.</p>
